

### *General information*

1. I have graded assignment 0. A grade of 1 means you pass, 0 means you don't. Those of you who didn't pass in the first round will have a chance to hand in again by next wednesday; send me an email with your updated assignment. Remember you need 6/9 to pass.
2. The solutions for exercise set 1 are on github.
3. For assignment 1 you *must* work in groups of 2-4.
