

Project groups

We will spend 20-30 minutes on brain-storming possible exam projects and forming groups (with emphasis on the *forming groups* part).

Once you know who will be in your group head to the [google sheet](#) and fill in your group info.

The company *Grød* has generously offered access to data from their cash registers and employee timesheets. If you want to know more ask me.

THE CHOICE SET IN A GROUP OF SIZE $N + 1$ IS STRICTLY LARGER
THAN IN A GROUP OF SIZE N .
